Release Management

Feature/Service	Standard	Enterprise	Business Critical	VPS
24-hour early access to weekly new releases, which can be used for additional testing or validation before each release is deployed to your production accounts.		✓	✓	✓

Security, Governance, and Data Protection

Feature/Service	Standard	Enterprise	Business Critical	VPS
SOC 2 Type II certification.	✓	✓	✓	✓
Federated authentication and SSO for centralizing and streamlining user authentication.	✓	✓	✓	✓
OAuth for authorizing account access without sharing or storing user login credentials.	✓	✓	✓	✓
Network policies for limiting/controlling site access by user IP address.	✓	✓	✓	✓
Automatic encryption of all data.	✓	✓	✓	✓
Support for multi-factor authentication.	✓	✓	✓	✓
Object-level access control.	✓	✓	✓	✓
Standard Time Travel (up to 1 day) for accessing/restoring modified and deleted data.	✓	✓	✓	✓
Disaster recovery of modified/deleted data (for 7 days beyond Time Travel) through Fail-safe.	✓	✓	✓	✓

We use cookies to improve your experience on our site. By accepting, you agree to our privacy policy.

Feature/Service	Standard	Enterprise	Business Critical	VPS
Extended Time Travel (up to 90 days).		✓	✓	✓
Periodic rekeying of encrypted data for increased protection.		✓	✓	✓
Column-level Security to apply masking policies to columns in tables or views.		✓	✓	✓
Row-level Security to apply row access policies to determine which rows are visible in a query result.		✓	✓	✓
Aggregation policies that enforce privacy by requiring queries to aggregate data to return results.		✓	✓	✓
Projection policies that restrict who can use a SELECT statement to project a column.		✓	✓	✓
Differential privacy to protect data against targeted privacy attacks.		✓	✓	✓
Object Tagging to apply tags to Snowflake objects to facilitate tracking sensitive data and resource usage.		✓	✓	✓
Support for classifying potentially sensitive data using classification.		✓	✓	✓
Audit the user access history through the Account Usage ACCESS_HISTORY view.		✓	✓	✓
Event tables associated with a database by associating an event table with an object.		✓	✓	✓
Customer-managed encryption keys through Tri-Secret Secure.			✓	✓

Feature/Service	Standard	Enterprise	Business Critical	VPS
Google Cloud Private Service Connect.				
Support for private connectivity to Snowflake internal stages using AWS PrivateLink and Azure Private Link.			✓	✓
Support for Pinning private connectivity endpoints for inbound traffic.			✓	✓
Support for PHI data (in accordance with HIPAA and HITRUST CSF regulations).			✓	✓
Support for PCI DSS.			✓	✓
Support for public sector workloads that meet U.S. Federal and state government requirements, such as FedRAMP and ITAR.			✓	✓
Support for IRAP - Protected (P) data (in specified Asia Pacific regions).			✓	✓
Dedicated metadata store and pool of compute resources (used in virtual warehouses).				✓
Data Quality and data metric functions to monitor the state and integrity of data.		✓	✓	✓

Compute Resource Management

Feature/Service	Standard	Enterprise	Business Critical	VPS
Virtual warehouses, separate compute clusters for isolating query and data loading workloads.	✓	✓	✓	✓
Resource monitors for monitoring	✓	✓	✓	✓

We use cookies to improve your experience on our site. By accepting, you agree to our privacy policy.

Feature/Service	Standard	Enterprise	Business Critical	VPS
Multi-cluster virtual warehouses for scaling compute resources to meet concurrency needs.		✓	✓	✓

SQL Support

Feature/Service	Standard	Enterprise	Business Critical	VPS
Standard SQL, including most DDL and DML defined in SQL:1999.	✓	✓	✓	✓
Advanced DML such as multi-table INSERT, MERGE, and multi-merge.	✓	✓	✓	✓
Broad support for standard data types.	✓	✓	✓	✓
Native support for semi-structured data (JSON, Avro, ORC, Parquet, and XML).	✓	✓	✓	✓
Native support for geospatial data.	✓	✓	✓	✓
Native support for unstructured data.	✓	✓	✓	✓
Collation rules for string/text data in table columns.	✓	✓	✓	✓
Integrity constraints (not enforced) on table columns for informational and modeling purposes.	✓	✓	✓	✓
Multi-statement transactions.	✓	✓	✓	✓
User-defined functions (UDFs) with support for Java, JavaScript, Python, and SQL.	✓	✓	✓	✓
External functions for extending Snowflake to other development platforms.	✓	✓	✓	✓

We use cookies to improve your experience on our site. By accepting, you agree to our privacy policy.

Feature/Service	Standard	Enterprise	Business Critical	VPS
Amazon API Gateway private endpoints for external functions.			✓	✓
Stored procedures with support for Java, JavaScript, Python, Scala, and SQL (Snowflake Scripting).	✓	✓	✓	✓
Dynamic tables for automatically materializing the results of a specified SQL query and keeping them up to date to meet your data freshness target.	✓	✓	✓	✓
External tables for referencing data in a cloud storage data lake.	✓	✓	✓	✓
Hybrid tables for data in transactional and analytical workloads.	✓	✓	✓	✓
Support for clustering data in very large tables to improve query performance, with automatic maintenance of clustering.	✓	✓	✓	✓
Query acceleration for parallel processing portions of eligible queries.		✓	✓	✓
Search optimization for point lookup queries, with automatic maintenance.		✓	✓	✓
Materialized views, with automatic maintenance of results.		✓	✓	✓
Iceberg tables for referencing data in a cloud storage data lake.	✓	✓	✓	✓
Schema detection for automatically detecting the schema in a set of staged semi-structured data files and retrieving the column definitions.	✓	✓	✓	✓
Schema evolution for automatically	✓	✓	✓	✓

Interfaces and Tools

Feature/Service	Standard	Enterprise	Business Critical	VPS
Snowsight, the next-generation SQL worksheet for advanced query development, data analysis, and visualization.	✓	✓	✓	✓
SnowSQL, a command line client for building/testing queries, loading/unloading bulk data, and automating DDL operations.	✓	✓	✓	✓
SnowCD, a command line diagnostic tool for identifying and fixing client connectivity issues.	✓	✓	✓	✓
Programmatic interfaces for Python, Spark, Node.js, .NET.js, PHP, and Go.	✓	✓	✓	✓
Native support for JDBC and ODBC.	✓	✓	✓	✓
Snowflake SQL API, a REST API for accessing and updating data in a Snowflake database.	✓	✓	✓	✓
Extensive ecosystem for connecting to ETL, BI, and other third-party vendors and technologies.	✓	✓	✓	✓
Snowflake Partner Connect for initiating free software/service trials with a growing network of partners in the Snowflake ecosystem.	✓	✓	✓	✓
Snowpark, the set of libraries and runtimes that securely deploy and process non-SQL code, including Python, Java, and Scala.	✓	✓	✓	✓
Streamlit in Snowflake for building, deploying, and sharing Streamlit apps on Snowflake data cloud.	✓	✓	✓	✓

We use cookies to improve your experience on our site. By accepting, you agree to our privacy policy.

Feature/Service	Standard	Enterprise	Business Critical	VPS
Bulk loading from delimited flat files (CSV, TSV, etc.) and semi-structured data files (JSON, Avro, ORC, Parquet, and XML).	✓	✓	✓	✓
Bulk unloading to delimited flat files and JSON files.	✓	✓	✓	✓
Snowpipe for continuous micro-batch loading.	✓	✓	✓	✓
Snowpipe Streaming for low-latency loading of streaming data.	✓	✓	✓	✓
Snowflake Connector for Kafka for loading data from Apache Kafka topics.	✓	✓	✓	✓

Data Pipelines

Feature/Service	Standard	Enterprise	Business Critical	VPS
Streams for tracking table changes.	✓	✓	✓	✓
Tasks for scheduling the execution of SQL statements, often in conjunction with table streams.	✓	✓	✓	✓

Data Replication and Failover

Feature/Service	Standard	Enterprise	Business Critical	VPS
Database and share replication between Snowflake accounts (within an organization) to synchronize databases, shared objects, and stored data.	✓	✓	✓	✓
Failover and failback between Snowflake accounts for business			✓	✓

We use cookies to improve your experience on our site. By accepting, you agree to our privacy policy.

Feature/Service	Standard	Enterprise	Business Critical	VPS
Redirecting client connections between Snowflake accounts for business continuity and disaster recovery.			✓	✓

Data Sharing

Feature/Service	Standard	Enterprise	Business Critical	VPS
Snowflake Marketplace	✓	✓	✓	
Universal Search	✓	✓	✓	✓
Build data products, monetize listings, and analyze your successes in Snowflake Marketplace.	✓	✓	✓	
Public Listings	✓	✓	✓	
Private Listings	✓	✓	✓	✓
With VPS, collaborate privately while strictly upholding requirements for security and isolation.				✓
Make data accessible without moving it using cross-cloud auto-fulfillment powered by Snowgrid™.	✓	✓	✓	✓
Collaborate with Snowflake Data Clean Rooms.	✓	✓	✓	
Create and manage your own Snowflake Data Clean Rooms.		✓	✓	✓
Collaborate using one of Snowflake's many collaborative technologies.	✓	✓	✓	✓
Replicate shared data to keep it synchronized within your organization.	✓	✓	✓	✓

Feature/Service	Standard	Enterprise	Business Critical	VPS
Use Snowflake Cortex LLM functions to respond to plain-language prompts, answer questions, summarize or translate text, find similar documents, and more.	✓	✓	✓	✓
Use Snowflake Copilot to engage in conversations about your structured data.	✓	✓	✓	✓
Use Cortex Analyst to help write applications that can engage in conversations about your structured data.	✓	✓	✓	✓
Use Cortex Fine-tuning to create large language models specialized for your needs without the usual training costs.	✓	✓	✓	✓
Use Cortex Search to enable high-quality semantic search over your Snowflake data.	✓	✓	✓	✓
Use Document AI to extract data from PDFs and other documents and to create pipelines for processing documents of a specific type.	✓	✓	✓	✓
Use ML Functions to analyze your data using our machine-learning models trained on your data.	✓	✓	✓	✓
Use the Snowflake Model Registry as a central repository for machine learning models within your organization.	✓	✓	✓	✓
Use the Snowflake Feature Store to create a repository of data transformations that can be used to train machine learning models.		✓	✓	✓

Feature/Service	Standard	Enterprise	Business Critical	VPS
Snowflake Community, Snowflake's online Knowledge Base and support portal (for logging and tracking Snowflake Support tickets).	✓	✓	✓	✓
Premier support, which includes 24/7 coverage and 1-hour response window for Severity 1 issues.	✓ [1]	✓	✓	✓

[1] Applies only to Standard accounts provisioned after May 1, 2020; Standard accounts provisioned before May 1 will continue to receive Standard support (as defined in 'Support Policy and Service Level Agreement') until the account is transitioned to Premier support.
