SnowPro Core v1.0 (SnowPro Core)

Question 76 (Single Topic)

When should you consider disabling auto-suspend for a Virtual Warehouse? (Choose two.)

A. When users will be using compute at different times throughout a 24/7 period
B. When managing a steady workload
C. When the compute must be available with no delay or lag time
D. When you do not want to have to manually turn on the Warehouse each time a user needs it

Answer : **BC**

https://docs.snowflake.com/en/user-guide/warehouses-overview.html

Question 79 (Single Topic)

True or False: Multi-Factor Authentication (MFA) in Snowflake is only supported in conjunction with Single Sign-On (SSO).

A. True
B. False

Answer : **B**

Reference:
https://docs.snowflake.com/en/user-guide/admin-security-fed-auth-use.html

Question 80 (Single Topic)

The number of queries that a Virtual Warehouse can concurrently process is determined by (Choose two.):

A. The complexity of each query
B. The CONCURRENT_QUERY_LIMIT parameter set on the Snowflake account
C. The size of the data required for each query
D. The tool that is executing the query

Answer : **AC**
